## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The wording of step D is garbled and inaccurate. It says:“(D) adding the thus-obtained CMPB-containing concentrate in an ether solvent and to a hydrocarbon solvent to precipitate CMPB crystals.” Judging from the specification, the CMPB-containing concentrate is added to an ether solvent, and that solution is added to a hydrocarbon. Such a fix is suggested.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Tanaka.

In Tanaka, see 3c. Page 3047, left column, refers to the compounds of formula 3 as being obtained by "fractional crystallization". This means that these were in fact crystals.

***Information Disclosure Statement***

The "Taiwan Office Action" document was struck from the 2007 IDS as it is not a full citation (action for what?) and was not provided. The remarks state, "That is, the Office Action from Taiwan was not intended to be a reference, but was listed in an IDS to confirm that it has been considered." As was stated, it was not provided. Nothing that looks like a "Taiwan Office Action" was received.

Ref AI was struck because it was not a full copy of the patent. The patent is only two sheets. The IDS states that it "corresponds" to Reference AA which is US 4898939, which is a much, much longer document, even ignoring the claims which can change in prosecution. Therefore, it appears to the examiner that the reference is incomplete.
